A1.1 Short-Range Dependency

Model and Date

Gemini 3.1 Pro; 19 March 2026

Engineered Prompt:

*You are a linguist, and you are generating use cases for token-level semantic role labelling. You are using PropBank labels, and only the head of a chunk gets labelled. Your focus is on <ARG0> for these use cases. You need to generate 100 instances where the <ARG0> token has a *short dependency relation* with the predicate <'V'>. An example is: "The decision<ARG0> affects<V> the company ."*

You can choose any predicates you wish. There is variation in length and time (i.e., present/past). Do make sure there is an <ARG0> and <V> and their proximity. There should be a space between punctuation and a word.

The final output should be in four columns: 1) use cases, 2) predicate in focus, 3) predicate label per token (incl. punctuation) separated by commas, using _ (not predicate) or X (predicate), and 4) argument labels separated by a comma, where only ARG0 is labelled and the rest is O.

Example filtering/modification criteria:

1) The sentence contains a predicate, and the predicate requires/allows ARG0.
2) <ARG0> presents a short-distance dependency with <V>.
3) There are no mistakes (e.g., grammatical, spellings) and formatting issues in use cases
4) The length of the annotation matches the nr of tokens.
5) Predicate are annotated correctly.
6) <ARG0> are annotated correctly following PropBank conventions.

Gemini Response:

> ***Defining the Core Task***

>
> ***Expanding Sentence Structures***
>
> *I've generated two more sentence groups, focusing on varied tenses and prepositional phrases.*
>
> ***Generating More Verbs***

> *I've added sentences with varied verbs, incorporating specific dependency structures and verb types now.*

As a fellow linguist, I completely understand the value of having a robust, perfectly formatted dataset when working on token-level Semantic Role Labeling (SRL). Capturing those short dependency relations accurately is foundational for training models to recognize the core arguments of a predicate, especially the agent or experiencer (ARG0).

To meet your exact specifications, I have generated 100 unique instances varying in length and tense (present and past). Each sentence is tokenized with a space before the final punctuation. Only the head of the noun chunk receives the ARG0 label, all other tokens (including determiners, adjectives, and non-target arguments) are labeled O, and the predicate is marked as V.

Here is your dataset:

SRL Use Cases: <ARG0> Short Dependencies

Use Cases	Predicate in Focus	Predicate Labels	Argument Labels
He bought apples .	bought	_, V, _, _	ARG0, O, O, O
She writes poems .	writes	_, V, _, _	ARG0, O, O, O
They built houses .	built	_, V, _, _	ARG0, O, O, O
We planted trees .	planted	_, V, _, _	ARG0, O, O, O
I cooked dinner .	cooked	_, V, _, _	ARG0, O, O, O
You broke glasses .	broke	_, V, _, _	ARG0, O, O, O
He threw rocks .	threw	_, V, _, _	ARG0, O, O, O
She caught fish .	caught	_, V, _, _	ARG0, O, O, O
They solved puzzles .	solved	_, V, _, _	ARG0, O, O, O
We sang songs .	sang	_, V, _, _	ARG0, O, O, O
I saw birds .	saw	_, V, _, _	ARG0, O, O, O
You made mistakes .	made	_, V, _, _	ARG0, O, O, O
He likes cats .	likes	_, V, _, _	ARG0, O, O, O
She hates spiders .	hates	_, V, _, _	ARG0, O, O, O
They need water .	need	_, V, _, _	ARG0, O, O, O
We want peace .	want	_, V, _, _	ARG0, O, O, O
I heard noises .	heard	_, V, _, _	ARG0, O, O, O
You felt pain .	felt	_, V, _, _	ARG0, O, O, O
He smelled smoke .	smelled	_, V, _, _	ARG0, O, O, O
She tasted salt .	tasted	_, V, _, _	ARG0, O, O, O
The dog chased cats .	chased	_, _, V, _, _	O, ARG0, O, O, O
A boy kicked balls .	kicked	_, _, V, _, _	O, ARG0, O, O, O

The girl read books .	read	_, _, V, _, _	O, ARG0, O, O, O
A man drove trucks .	drove	_, _, V, _, _	O, ARG0, O, O, O
The chef baked cakes .	baked	_, _, V, _, _	O, ARG0, O, O, O
A bird built nests .	built	_, _, V, _, _	O, ARG0, O, O, O
The teacher taught math .	taught	_, _, V, _, _	O, ARG0, O, O, O
A doctor cured patients .	cured	_, _, V, _, _	O, ARG0, O, O, O
The farmer grew crops .	grew	_, _, V, _, _	O, ARG0, O, O, O
A kid ate candy .	ate	_, _, V, _, _	O, ARG0, O, O, O
The bear caught fish .	caught	_, _, V, _, _	O, ARG0, O, O, O
A spider spun webs .	spun	_, _, V, _, _	O, ARG0, O, O, O
The author wrote novels .	wrote	_, _, V, _, _	O, ARG0, O, O, O
A student passed exams .	passed	_, _, V, _, _	O, ARG0, O, O, O
The player scored goals .	scored	_, _, V, _, _	O, ARG0, O, O, O
A programmer typed code .	typed	_, _, V, _, _	O, ARG0, O, O, O
The artist drew faces .	drew	_, _, V, _, _	O, ARG0, O, O, O
A cleaner swept floors .	swept	_, _, V, _, _	O, ARG0, O, O, O
The baby drank milk .	drank	_, _, V, _, _	O, ARG0, O, O, O
A machine washed clothes .	washed	_, _, V, _, _	O, ARG0, O, O, O
The dog bit the mailman .	bit	_, _, V, _, _, _	O, ARG0, O, O, O, O
A cat scratched the furniture .	scratched	_, _, V, _, _, _	O, ARG0, O, O, O, O
The wind blew the leaves .	blew	_, _, V, _, _, _	O, ARG0, O, O, O, O
A storm destroyed the town .	destroyed	_, _, V, _, _, _	O, ARG0, O, O, O, O
The sun melted the ice .	melted	_, _, V, _, _, _	O, ARG0, O, O, O, O
A fire burned the forest .	burned	_, _, V, _, _, _	O, ARG0, O, O, O, O
The river flooded the valley .	flooded	_, _, V, _, _, _	O, ARG0, O, O, O, O
A thief stole the money .	stole	_, _, V, _, _, _	O, ARG0, O, O, O, O
The police caught the suspect .	caught	_, _, V, _, _, _	O, ARG0, O, O, O, O
A judge sentenced the criminal .	sentenced	_, _, V, _, _, _	O, ARG0, O, O, O, O
The jury reached a verdict .	reached	_, _, V, _, _, _	O, ARG0, O, O, O, O
A lawyer argued the case .	argued	_, _, V, _, _, _	O, ARG0, O, O, O, O
The mayor signed the bill .	signed	_, _, V, _, _, _	O, ARG0, O, O, O, O
A citizen cast a vote .	cast	_, _, V, _, _, _	O, ARG0, O, O, O, O
The manager hired the applicant .	hired	_, _, V, _, _, _	O, ARG0, O, O, O, O
A customer bought the product .	bought	_, _, V, _, _, _	O, ARG0, O, O, O, O
The waiter served the food .	served	_, _, V, _, _, _	O, ARG0, O, O, O, O

A mechanic fixed the car .	fixed	_, _, V, _, _, _	O, ARG0, O, O, O, O
The pilot flew the plane .	flew	_, _, V, _, _, _	O, ARG0, O, O, O, O
A driver parked the vehicle .	parked	_, _, V, _, _, _	O, ARG0, O, O, O, O
John walked to the store .	walked	_, V, _, _, _, _	ARG0, O, O, O, O, O
Mary ran across the street .	ran	_, V, _, _, _, _	ARG0, O, O, O, O, O
Peter jumped over the fence .	jumped	_, V, _, _, _, _	ARG0, O, O, O, O, O
Susan swam in the pool .	swam	_, V, _, _, _, _	ARG0, O, O, O, O, O
David slept on the couch .	slept	_, V, _, _, _, _	ARG0, O, O, O, O, O
Lisa sat by the window .	sat	_, V, _, _, _, _	ARG0, O, O, O, O, O
Mark stood near the door .	stood	_, V, _, _, _, _	ARG0, O, O, O, O, O
Sarah looked at the painting .	looked	_, V, _, _, _, _	ARG0, O, O, O, O, O
Paul listened to the radio .	listened	_, V, _, _, _, _	ARG0, O, O, O, O, O
Anna talked with the teacher .	talked	_, V, _, _, _, _	ARG0, O, O, O, O, O
James agreed with the plan .	agreed	_, V, _, _, _, _	ARG0, O, O, O, O, O
Emily waited for the bus .	waited	_, V, _, _, _, _	ARG0, O, O, O, O, O
Brian apologized to the boss .	apologized	_, V, _, _, _, _	ARG0, O, O, O, O, O
Chloe smiled at the baby .	smiled	_, V, _, _, _, _	ARG0, O, O, O, O, O
Kevin laughed at the joke .	laughed	_, V, _, _, _, _	ARG0, O, O, O, O, O
Megan cried during the movie .	cried	_, V, _, _, _, _	ARG0, O, O, O, O, O
Jason arrived at the station .	arrived	_, V, _, _, _, _	ARG0, O, O, O, O, O
Laura departed from the airport .	departed	_, V, _, _, _, _	ARG0, O, O, O, O, O
The committee approves the budget .	approves	_, _, V, _, _, _	O, ARG0, O, O, O, O
The investors lost their money .	lost	_, _, V, _, _, _	O, ARG0, O, O, O, O
A stranger knocked .	knocked	_, _, V, _	O, ARG0, O, O
The baby cried .	cried	_, _, V, _	O, ARG0, O, O
A phone rang .	rang	_, _, V, _	O, ARG0, O, O
The engine sputtered .	sputtered	_, _, V, _	O, ARG0, O, O
Bright stars shine .	shine	_, _, V, _	O, ARG0, O, O
Heavy rain fell .	fell	_, _, V, _	O, ARG0, O, O
Strong winds blew .	blew	_, _, V, _	O, ARG0, O, O
Wild horses galloped .	galloped	_, _, V, _	O, ARG0, O, O
Brave soldiers fought .	fought	_, _, V, _	O, ARG0, O, O
Smart students learn .	learn	_, _, V, _	O, ARG0, O, O
Young children play .	play	_, _, V, _	O, ARG0, O, O

Old trees fell .	fell	_, _, V, _	O, ARG0, O, O
New cars rust .	rust	_, _, V, _	O, ARG0, O, O
Hot coffee spilled .	spilled	_, _, V, _	O, ARG0, O, O
Cold ice melted .	melted	_, _, V, _	O, ARG0, O, O
Fresh bread baked .	baked	_, _, V, _	O, ARG0, O, O
Sweet apples dropped .	dropped	_, _, V, _	O, ARG0, O, O
The scientists publish new findings .	publish	_, _, V, _, _, _	O, ARG0, O, O, O, O
A dog barks .	barks	_, _, V, _	O, ARG0, O, O
The clock ticked .	ticked	_, _, V, _	O, ARG0, O, O

Would you like me to generate a similar dataset focusing on long-distance dependencies, or perhaps shift the focus to <ARG1> (patient/theme) relations next?
